

## Seattle Python June Syllabus

@instructor\_prescott  
pbreeden@codingdojo.com

### Dojo Handbook Reminders

- ❖ Be Present
  - A minimum of 80% attendance is required to graduate. (3 lates = 1 absence)
- ❖ Strength Through Struggle
  - Struggle should be limited to 20 minutes.
- ❖ Be Humble
  - *We do not tolerate negative attitudes or disrespect in this environment. If we hear or see that you are being a nuisance or disrespectful to others in any way, shape or form, we will kindly ask you to leave the bootcamp.*

### Pace & Action Plans

While every student works at their own pace, each student must make themselves accountable to put in the necessary hours to keep up with the content. Always review learning objectives each day!

Tuesday of week 2 will be an important checkpoint for progress. Any student more than two-days behind will sit down with me and together we will create an Action Plan to outline how to get you back on pace to have a successful stack. Any students who fail to put in the work required may be subject to Academic Probation.

### Third-party Tutorials

If you are falling behind, do *NOT* decide the best course of action is to start watching youtube!

### Contact

If you should have any questions, concerns or feedback, please do not hesitate to bring them to my attention. Examples of awesome things I love to get in my inbox:

“Hey Prescott,”

- I’m still super confused about how {concept} works...
- I don’t understand what {assignment} is trying to teach...
- The instructions for {assignment} are really confusing to me...
- I’m not going to make it in for class tomorrow but here is my plan to not fall behind...

I will not always be readily available for an immediate answer outside of dojo hours however do not let that stop you from letting me know your struggles, triumphs, thoughts or concerns.

### General Schedule

9:00 AM => Algorithms and Data Structures -- DO NOT SKIP MORNING ALGOS !!!

10:30 AM => Standups, Announcements and Lecture/Discussion
